PROFILE

Penultimate-year Computing Science (Honours) student with professional experience at WiseTech Global (ASX-listed) and a self-directed tech lead role building a production web application. Comfortable with Python and SQL for data analysis, with a strong foundation in software development practices including Git, deployment pipelines, and cross-functional team collaboration. Seeking a data analyst internship where analytical thinking and technical skills can drive real business impact.

EXPERIENCE

Tech Lead · Independent Tutoring Business

Feb 2025 – Present

Part-time · Web platform rebuilds from Wix to a fully custom-coded application

- Architecting and building a full-stack tutoring platform from scratch, replacing an existing Wix site with a custom-coded solution backed by a relational database
- Designing the database schema and system architecture, including a booking system, tutor profiles, and student portal
- Solely responsible for all technical decisions — frontend development, backend logic, and deployment strategy
- Collaborating directly with the business owner to translate operational requirements into technical solutions

Software Cadet · WiseTech Global

2024

ASX-listed logistics technology company · Cadetship program

- Contributed to real team projects within accounting and logistics software products, working alongside senior engineers
- Developed frontend features using HTML and CSS; wrote application logic in C and C#
- Followed professional Git workflows including branching, merging, pull requests, and code reviews in a team environment
- Participated in deployment processes and gained exposure to CI/CD practices in a large-scale software organisation
- Collaborated across teams in an agile environment, building skills in professional communication and cross-functional delivery

Warehouse Operator · Sapphire Group · Various · Amazon

2024 – Present

2+ years across multiple warehouse environments

- Maintained consistent performance across high-volume operations at Amazon fulfilment and specialist manufacturing environments
- Currently responsible for chemical batching and wax formulation processes at Sapphire Group, requiring precision and strict compliance with safety procedures
- Demonstrated adaptability working across diverse operational environments and employer requirements

EDUCATION

Bachelor of Computing Science (Honours) · UTS 2022 – 2027 (expected)

- Year 3 of 4 — penultimate year, eligible for 2026/27 internship programs
- Focus areas: data structures, algorithms, software engineering, databases, and computing systems

SKILLS & TOOLS

Languages: Python, SQL, C, C#, HTML, CSS, JavaScript

Data: pandas, NumPy, data cleaning, analysis, visualisation

Tools: Git, GitHub, VS Code, command line, database design

Practices: Version control workflows, agile teamwork, deployment pipelines, code review

Soft skills: Cross-functional collaboration, translating business needs to technical solutions, self-directed learning

CERTIFICATIONS

Prompt Engineering Workshop · Cognizant *Gen AI* Aug 2024

- Completed hands-on workshop covering prompt design, generative AI fundamentals, and applied use cases in enterprise settings

Oracle Cloud Infrastructure: AI Foundations · Oracle Expected Jul 2026

- Covers AI/ML concepts, Oracle Cloud AI services, and practical foundations for building AI-powered cloud applications

Information Privacy & Security · Grok Academy — *Schools Cyber Security Challenge* 2023

- Completed cybersecurity challenge covering data privacy principles, threat identification, and secure system practices

PROJECTS

Tutoring Platform Rebuild · 2024 – Present

- End-to-end rebuild of a live tutoring business website — custom frontend, relational database, booking system, and tutor portal
- Sole developer and architect; responsible for all technical and design decisions

Portfolio Website · 2026

- Designed and built a personal portfolio site from scratch using HTML, CSS, and JavaScript — live at arunachanjayakanth.github.io
- Custom animations, responsive layout, and hosted on GitHub Pages
